

The Foundations of Privacy Contracting

Understanding the intricacies of privacy contracting is essential for legal professionals working in privacy.

Privacy and security disclosures

Privacy policy

- Types of data subjects:
 - Website users
 - Customers
 - Partners
 - Employees
- Types of Information Collected
- Contact Links for Data Subjects

Sub-processors and Affiliates Disclosure

- Information About Sub-processors:
 - Entity details
 - Location
 - Purpose of data processing
 - Safeguards (DPF, SCCs)
 - Data privacy representative contact info

Technical and organizational measures (TOMS)

- Encryption measures
- Data center locations
- Physical security controls
- Third-party compliance audits
- Access controls
- Penetration testing
- Data deletion, export, and return policies

Cookie policy

- Types of cookies (essential, analytics, content)
- How to disable or delete certain cookies

Policies and addenda

Data Processing Agreement (DPA)

- Purpose of data processing
- Type of data processed
- Data processing instructions
- Duration of data processing rights
- Obligations of both parties

Acceptable use policy

- Usage Restrictions
- Prohibition of illegal, harmful, or offensive use
- Rights to monitor and enforce prohibitions

Accessibility policy

- Commitment to Web Content Accessibility Guidelines (WCAG) 2.1AA

Security addendum

- Administrative safeguards (incident response, change management, background checks)
- Technical safeguards (physical security, vulnerability scanning, network security)
- Organizational safeguards (security program, third-party assessments, disaster recovery)

Business associate addendum (BAA)

- Protects personal health information (PHI)
- Required under HIPAA for services involving PHI
- Ensures compliance with specific data protection standards

Ensure strong privacy contracting practices
